this unique design collection can be delivered in colours as above

Planet Little Kids Furniture has joined forces with famous Dutch designer **Piet Boon**. The result is an exclusive collection of children's furniture, including a cradle, changing table, three-in-one bed, shelve, wardrobe, junior bed and adult bed.

For our co production, **Piet Boon** dares to be different in his choice of materials. Besides solid oak, his favourite type of wood, he has used soft stitched leather in some of the pieces. The inner material consists of BeeBoard, a layered honeycomb structure with MDF and an oak veneer finish.

Dutch designer Piet Boon is renowned for his sturdy and sober style. His furniture designs are well-known throughout the world. But Boon also offers total concepts, starting with the design and construction of a building and ending with the interior.

His creations include restaurants, offices, shops, luxurious resorts and private homes. Piet Boon works with natural, honest materials. Agelessness, durability, comfort and ease are key elements in his designs.
